FORMATIVE ASSIGNMENT PART 2

CYBERSAFE HUB

Prior to and Following Improvements

Overview

The Cybersafe Hub website was examined and enhanced to make it more polished and eye-catching. Adding a dedicated Gallery page and enhancing the website's style were the primary modifications.

Website Styling Previously

The website's design and layout were simple. The pages could be enhanced to offer a better visual experience, and certain components lacked a consistent professional appearance.

Gallery Page Previously

There was no specific page on the website where users could browse pictures. Text and information were the website's primary focus.

After: The website now has a new Gallery page. The Gallery offers a space set aside for exhibiting pictures in a neat and eye-catching arrangement. This enhances the website's visual content and increases user engagement.

General Appearance

Prior to: The website needed further graphic enhancements to look more finished and professional because it had a basic design.

After: The website appears more professional and comprehensive thanks to the new Gallery page and enhanced style. Additionally, the modifications aid in establishing a unified visual identity across the Cybersafe Hub.

Experience of the User

Before: There were fewer graphic components for users to interact with, and the website might seem simplistic.

After: The website is now more visually appealing and well-organized for users. While the Gallery provides customers with an extra page to browse, the enhanced design makes content easier to view.

Synopsis of Enhancements

The following were the primary enhancements made to Cybersafe Hub:

- Enhanced CSS styling in general.
- Made the page layout more polished.

- Better fonts, colors, and spacing.
- Buttons and titles looked better.
- Kept the website's styling uniform.
- A new Gallery page has been added.
- Added a well-organized space for picture display.
- Enhanced the user experience and overall visual appeal.

In conclusion, Cybersafe Hub is now a more polished and eye-catching website thanks to the enhancements done. While the new Gallery page adds visual material and offers customers another area to explore, the enhanced design ensures uniformity throughout the pages. These modifications enhance the website's general usability and presentation.
