Organization Overview

A fake cybersecurity awareness group called Cyber Safe Hub was founded to teach people, organizations, and educational institutions about responsible online conduct. The group offers helpful advice on ransomware, malware, phishing, password security, and data privacy. Cyber Safe Hub seeks to assist users in creating safe digital practices and lowering the risk of cybercrime thru informative articles, awareness campaigns, and online learning tools. Our mission is to empower individuals by educating them about cybersecurity. Vision: To build a more secure online community. Students, teachers, SMEs, parents, and internet users are the target audience.

Website Goals and Objectives

The website would create a Cyber Safe Hub online presence, offer free cybersecurity tools, let people sign up for awareness classes, publish news, and promote reporting of cyber problems. Reaching 2,000 monthly visitors, 500 course registrations, a bounce rate below 40%, and user satisfaction exceeding 4.5/5 are some of the KPIs.

Current Website Analysis

Since Cyber Safe Hub is a new organization, it does not currently have a website. Building a quality website will increase credibility, give instructional content a convenient location, and facilitate public contact. The website will be easily navigable, accessible, and mobile responsive.

Proposed Website Features

- Home
- About Us
- Cybersecurity Tips
- Online Courses
- Blog & News
- Report a Cyber Incident
- FAQ
- Contact Us
- Newsletter
- User Login

Design and User Experience

A shield is used in the emblem to stand for trust and safety. Dark Navy (#030616), Electric Blue (#5EA8FF), Cyan (#35F2F2), and White (#FFFFFF) are the suggested color schemes. Aptos will be used for the website's responsive layout, straightforward navigation, and typography.

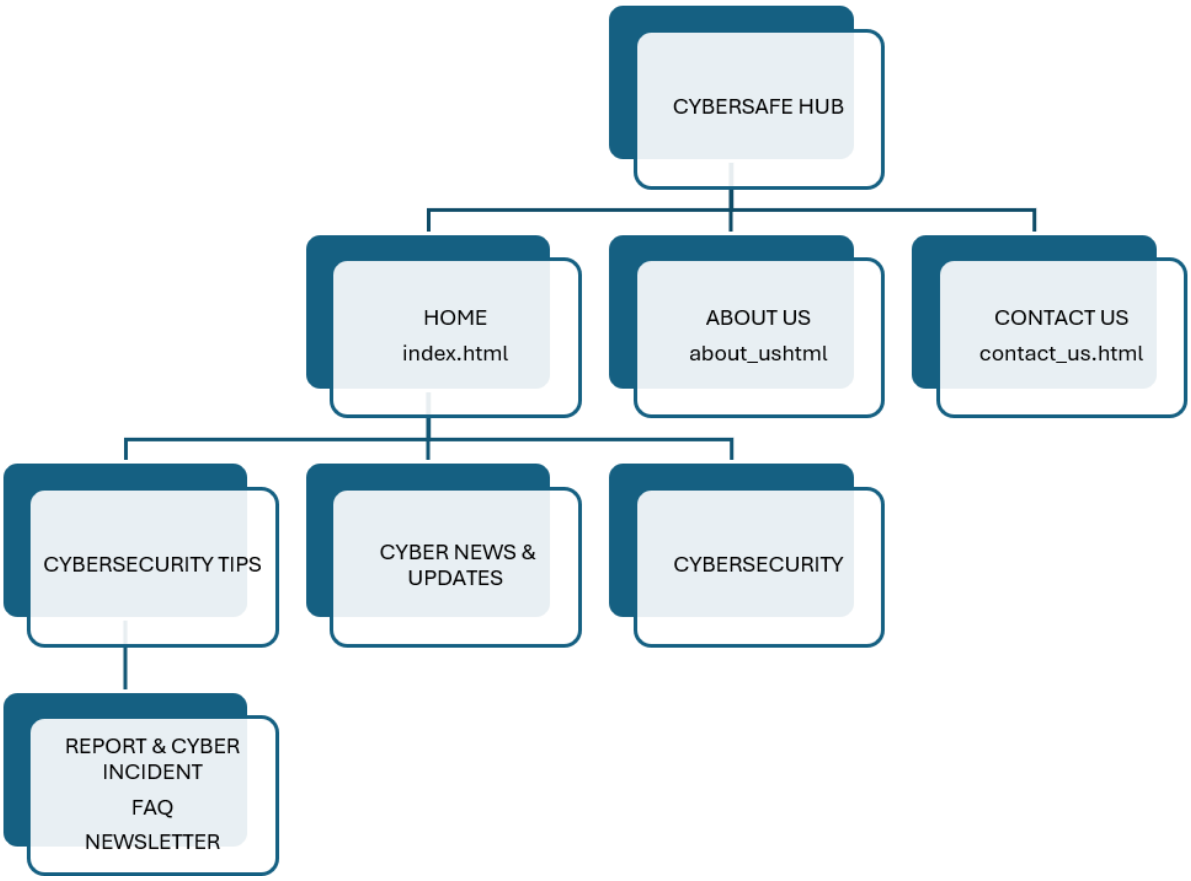

Low-quality wireframe

[Logo]

Home | About | Courses | Blog | Contact Hero Banner | Cyber Tips | Current News | Report Incident Footer

Technical specifications

Web hosting, HTML5, CSS3, JavaScript, PHP/Node.js, MySQL database, SSL certificate, GitHub, and domain registration.

Timeline

Week	Activity
1	Planning
2	Research
3	Design
4	Development
5	Testing
6	Deployment

Budget

Item	Cost
Domain	R250
Hosting	R1,500
SSL	R800
Developments	R15 ,000
Maintenance	R3,000

Total	R20,550

Conclusion

The planned website for Cyber Safe Hub will offer a safe, easily accessible, and educational platform devoted to cybersecurity awareness. The website will assist people and companies in enhancing their online safety by providing educational materials, helpful advice, online courses, and frequent cyber threat updates. The project is feasible and in keeping with the organization's goal of building a safer online community, as shown by the suggested design, technical specifications, schedule, and budget.
